Computer display screen system and adjustable screen mount, and swinging screens therefor

AB

(US9343005)

A dual screen display system having, a base, a pair of electronic display screens, an arm assembly supporting the display screens and connected to the base, swivelable mountings for swivelably mounting the display screens, the mountings being adjustable as to the angular orientation of each of the display screens relative to the arm assembly between a first arrangement with the screens in a common plane, and a second arrangement in which the screens are mutually facing positions thereby to permit each of the screens to be swung into desired operative angular orientation, and adjustable movement limiting device engaging the swivelable mountings and limiting movement of the screens.

(Also disclosed are interchangeable mounting brackets for mounting screens, of varying sizes, or 1 mounting screens in various configurations, and hingeable and rotatable support members for supporting the screens so the screens are swivelable to face in opposite directions.

A modular display system is also disclosed which allows a one, two three or four display panel system to be formed.
